Forecast for Sunday 25 Apr 2021

Weather: The early hours will be cold and clear, with air temperatures below zero on the mountain summits. However, there will be uninterrupted sunshine all day so temperatures will quickly rise. A brisk easterly breeze will make it feel colder than the temperatures suggest. Temperatures will drop again in the evening under clear skies and light winds.

Chance of cloud free mountain/hill tops above 600m: 100% chance of clear hill tops throughout.

Visibility: There will be one or two mist patches in the early hours but once the sun comes up there will be good views of distant hills throughout, perhaps up to 30km away.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Wind figures in the chart look realistic. The measured air temperatures are likely to rise a couple of degrees higher than shown in the table, perhaps reaching 15 Celsius in sheltered valleys. However, the brisk easterly wind will make it feel chilly. UV levels will be high so sun protection should be worn if you are out for long periods.

Forecast for Monday 26 Apr 2021

Weather: The early hours will be cold and clear, with air temperatures below zero on the mountain summits. Early mist and low cloud is possible. Widespread morning sunshine will gradually appear hazier as high cloud moves over the area during the afternoon. Winds will be lighter than on Sunday. Temperatures will drop quickly again in the evening under high cloud and light winds.

Maximum wind: 25 mph with gusts 35 mph on the summits before dawn, becoming lighter during the daylight hours.

Chance of cloud free mountain/hill tops above 600m: 60% chance in the early hours, with some patches of low cloud down to 400m. After 7am, 100% chance of clear hill tops throughout.

Visibility: There will be a few mist patches in the early hours along with some patches of low cloud down to 400m but once the sun comes up there will be good views of distant hills throughout, perhaps up to 30km away.

Temperature: **Valleys:** 3 C at dawn rising to 15 C in the early afternoon.
At 600m: -2 Celsius at dawn rising to 9 Celsius in the early afternoon.
Freezing level: 400m at dawn, rising well above summits by mid morning.
